

SUBSTANCE ABUSE TREATMENT FACT SHEET

Massachusetts Department of Public Health, Bureau of Substance Abuse Services

This fact sheet contains information about the impact of alcohol and other drug use in the Eighth Hampden Representative District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2003.

Residents of Eighth Hampden Representative District

Characteristics of Admission

In FY 2003, there were 115,896 admissions to licensed substance abuse treatment services in all of Massachusetts; 0.9% (1,087) of these admissions reside in the Eighth Hampden Representative District. 3% (32) of admission from the Eighth Hampden Representative District were under 17 years of age. **Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.** In FY2003, admissions to substance abuse treatment service from the Eighth Hampden Representative District were reported the following characteristics:

- 64% were male and 36% were female.
- 58% were between the ages of 30-49.
- 78% were white non-Latino, 4% were black non-Latino, 16% were Latino, and 2% were other racial categories.
- 61% were never married, 13% were married, and 27% reported not to be married now.
- 30% had less than high school education, 49% completed high school, and 21% had more than high school education.
- 27% were employed.
- 5% were homeless.
- 36% had prior mental health treatment.

Primary Substance of Use

At admission clients also identify a “primary drug” of use that is the substance for which the client is seeking treatment. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the Eighth Hampden Representative District.

Table 1					
Primary Drug by District and State FY 2003					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	47%	33%	7%	2%	6%
State	43%	38%	6%	4%	4%

Substances Used in Past Year

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use

Table 2 shows ALL substances which clients reported using in the year prior to admission, as well as the prevalence of injection drug users (or IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

Table 2 Annual Admissions by Substance Used: FY 1995 – FY 2003 Eight Hampden Representative District							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
FY '95	901	764	199	182	192	159	111
FY '96	872	728	182	159	169	145	101
FY '97	860	727	194	169	128	177	100
FY '98	978	820	239	202	128	220	123
FY '99	951	762	274	229	172	319	208
FY '00	1,135	898	326	285	234	431	258
FY '01	1,076	815	324	255	197	406	259
FY '02	1,088	799	307	233	234	436	283
FY '03	1,087	752	284	248	229	382	231

Heroin and Injection Drug Use

Figure 1 below shows the proportional increases in all admissions in the Eighth Hampden Representative District and the proportional increase in admissions reporting heroin and injection drug use, a factor driving increases in HIV.
